EGYPT DESERT RALLY

{ Rally 2025 & 2026 }

TECH TITANS

Under the Supervision of:

Dr. Nourhan Hamdi

General Supervision:

Dr. Sarah Nagi | Dr. Sabah Mohammed | Dr. Maged Gebr

Prepared by:

Abdullah Hussein Ramadan Atiya (Leader) | Alaa Hassan Mahmoud | Al-Shimaa Mohammed Mahmoud

Basmala Hussam El-Din Ashry | Yosra Hani Mahmoud El-Sayed | Safaa Ahmed Tayea

Hajer Abd El-Aziz Darwish | Shimaa Atef Abu El-Fadl | Kyrillos Gab-Allah Hakim

Ahmed Mohammed Mahmoud | Youssef Amr Sayed Ibrahim | Youssef Ahmed Farouk | Moamen
Mohammed Ahmed Abu El-Hassan | Mahmoud Abd El-Nabi Mohammed Ibrahim

2025 - 2026

Acknowledgements

Behind every success, many people contributed greatly. We extend our sincere thanks to all faculty members for their tremendous efforts with us throughout our studies at the college, and for their assistance to all students equally. We wish them continued success, progress, and prosperity.

Special Thanks and Appreciation to:

- Prof. Dr. Adel Zein — President of Thebes Technological University
- Prof. Dr. Mohammed Raslan — Vice President of the University
- Prof. Dr. Ali Hamdan — Dean, Faculty of Hotel and Tourism Services
- Dr. Sarah Nagi — Department Coordinator
- Dr. Sabah Mohammed
- Dr. Maged Gebr
- Dr. Nourhan — Deputy Director, Office of International Cooperation
- Dr. Mostafa Safwat
- Dr. Rehab Abd El-Rasoul
- Dr. Hajer Ahmed

We wish you all continued success and excellence in your academic and professional journeys. Thank you once again for everything you do for students and the community.

Moamen Mohammed Ahmed Abu El-Hassan 14. Mahmoud Abd El-Nabi Mohammed Ibrahim

Chapter One: Preliminary Study

Introduction

Where the depth of history meets the spark of the future, and from the heart of the enchanting desert that witnessed the dawn of human civilization, the project 'Egypt Desert Rally – West of Luxor' is launched to reintroduce adventure and motorsport tourism in the Middle East. This project is not merely a car race; it is a new investment pulse that merges sport, environment, and sustainable tourism development in Upper Egypt.

The project provides an integrated system of activities and services based on the concept of flexible efficiency, offering a professional and secure race track for four-wheel drive vehicles and motorcycles that meets international standards, supported by a smart administrative headquarters, an operations room equipped with GPS tracking systems and satellite communications to ensure the highest safety levels. The project also offers a unique tourist experience through folkloric activities, eco-camping nights, safe spectator viewing areas equipped with giant screens, in addition to technical, mechanical, and emergency medical support for participants.

Project Objectives:

1. Diversifying Egypt's tourism product by establishing a hub for adventure, challenges, and motorsport tourism in Luxor Governorate.
2. Achieving a high return on investment and attracting major international companies and sponsors through a smart financial model.
3. Supporting the local economy and creating job opportunities (permanent and temporary) for Upper Egyptians, and boosting aviation, hotel, and transportation activity in the region.
4. Applying eco-tourism standards and preserving the pristine desert nature as a model for sustainable green projects.

Project Importance

- Developing adventure, sports, and motorsport tourism in Egypt and introducing it as a distinctive tourist product.
- Exploiting the natural assets of the Egyptian desert to attract tourists.
- Providing a tourist experience that combines entertainment, adventure, and sports.
- Supporting the local economy by creating new job opportunities.
- Encouraging domestic and international tourism.

Reasons for Choosing This Project

The rally project in Luxor Governorate was chosen for several reasons:

5. Nature of the Location: The desert west of Luxor has terrain that is ready and ideal for racing without expensive preparation costs.
6. Tourism Diversification: Introducing 'adventure and motorsport tourism' alongside traditional archaeological tourism in Luxor.
7. Training Week: A new investment advantage that generates additional profits and increases participant safety before the official race.
8. Attracting Sponsors: Rallies attract massive funding from car companies, oil companies, and energy drink brands.
9. Boosting Hotels: Extending tourist and team stays for 10 full days revitalizes hotels and aviation.
10. Youth Support: Small businesses in the entertainment zone provide spaces for food trucks.
11. Job Opportunities: Creating hundreds of temporary jobs for youth and organizers on a daily/incentive basis.
12. Smart Cost: Reducing fixed expenses by renting land and using portable bleachers instead of permanent concrete structures.
13. Green Project: Preserving the natural desert environment without distortion or pollution.
14. Legal Safety: Providing an official, GPS-secured track for four-wheel drive racing enthusiasts.

Rally Logo Description

The logo embodies a unique blend of the spirit of desert adventure and modern technological advancement. A powerful rally car launches over sand dunes in a reference to the challenge, power, and speed. The background is inspired by the Egyptian desert with the appearance of the pyramids, reinforcing national identity and linking the event to Egypt's ancient heritage. Pharaonic symbols such as the scarab, the Eye of Horus, and the Ankh have been integrated in a contemporary style with digital elements (electronic circuits) to illustrate the meeting of past and present, reflecting the idea that the event is not merely a race but a modern experience based on technology and innovation.

Chapter Two: Environmental Study

Introduction

The environmental study aims to analyze the environment surrounding the project and identify the natural resources and environmental factors affecting it, in order to ensure the project is implemented in a manner that preserves the environment and supports sustainable development principles. The study also helps in identifying potential environmental impacts and developing appropriate measures to mitigate them, contributing to achieving a balance between tourism activity and the preservation of natural resources in the project area.

Section One: Site Description and Analysis

Location and Area of Luxor City

Luxor Governorate is located in southern Egypt on the banks of the Nile River. It is bordered by Qena Governorate to the north, Aswan Governorate to the south, the Red Sea Governorate to the east, and New Valley Governorate to the west. Luxor is considered one of the most important tourist destinations in Egypt due to its many rare archaeological and historical landmarks.

The area of Luxor Governorate is approximately 2,960 km², and it is distinguished by a strategic geographical location that links Upper Egypt governorates. It possesses a road network and transportation links that facilitate the movement of tourists and visitors. Its distinct location, dry and moderate climate for most of the year, supports various tourist activities and makes it a suitable environment for tourism and entertainment projects such as the rally project.

Project Location

In Luxor Governorate, on the West Bank, in the desert hinterland of Al-Dab'iya Village (the open area extending behind the Al-Dab'iya barrier).

Reasons for Choosing the Project Site

15. Close proximity to many archaeological and tourist landmarks that attract large numbers of tourists annually.
16. Distance from residential areas, ensuring complete safety and keeping the race away from citizen traffic.
17. Easy access to the site through the available road network and transportation means.
18. Availability of open desert areas suitable for holding the race.
19. Ready-made natural terrain: The land combines sand, rock, and elevations, providing race excitement without preparation costs.
20. Proximity to services and emergency services: Close to main roads and Luxor hospitals for dealing with any emergencies immediately.

Access Routes

- By Air (via aviation): Arriving at Luxor International Airport, then traveling overland via the New North Luxor Axis to reach the rally site on the West Bank within 20 minutes without entering city congestion.
- By Rail (trains): Arriving at Luxor Train Station (East Bank) via sleeping trains or express trains, then transferring to the West Bank via the axis or river ferries.
- By Road (cars and buses): From Cairo and other governorates via the Western Desert Road, which has a direct exit connecting to the site and the West Luxor desert.
- By River (via the Nile): Using river ferries and launches to cross from the East Bank (hotels and the tourist promenade) to the West Bank dock, then using internal transport buses to cover the short remaining distance to the track.

Section Two: Project Environment Study

Climatic Components

Element	Description
Temperature	The West Bank area of Luxor is characterized by a dry desert climate.
Humidity	Low for most days of the year, helping visitors feel comfortable.
Rainfall	Very rare.
Wind	Moderate winds for most of the year, helping to freshen the atmosphere in open areas.

Infrastructure Services

- Electricity network
- Water station
- Communications and internet networks
- Paved roads leading to the site

Superstructure Services

- Airports (e.g., Luxor International Airport)
- Hotels (e.g., Winters Palace / Hilton Luxor Resort)
- Hospitals (e.g., Luxor International Hospital / Karnak General Hospital)
- Banks (e.g., Banque Misr / Bank of Alexandria / QNB)
- Restaurants (e.g., McDonald's / KFC)

Tourist Attractions

- Karnak Temple

- Luxor Temple
- Mummification Museum
- Medinet Habu Temple
- Valley of the Kings
- Valley of the Queens

Environmental Impact Assessment

Definition of Environmental Impact:

It is the effect resulting from project implementation on the surrounding environment, whether positive or negative. It encompasses its impact on natural resources, air, water, soil, and living organisms.

Definition of Environmental Impact Assessment:

It is a scientific method used to identify and study the expected impacts of a project on the environment, and to develop the necessary measures to preserve it and achieve sustainable development.

Objectives of Environmental Impact Assessment:

21. Identifying potential environmental impacts of the project.
22. Reducing negative impacts on the environment.
23. Preserving natural resources.
24. Protecting human health and society.
25. Supporting sustainable development.
26. Improving the quality of the surrounding environment.
27. Rationalizing water and energy use.
28. Ensuring project compliance with environmental laws and conditions.

Types of Project Impacts on the Environment

- **White List Projects:** Projects with simple or limited environmental impact, which do not generate significant environmental damage — such as some small tourism and service projects.
- **Grey List Projects:** Projects with medium environmental impact, requiring a simplified study to assess the environmental impact and take measures to reduce their negative effects.
- **Black List Projects:** Projects with large and dangerous environmental impact, requiring a detailed and comprehensive study to assess the environmental impact before implementation, such as heavy industries and large industrial projects.
- **Regarding the Rally Project:** It is classified under White List projects because it is a sports tourism project.

SWOT Analysis

Strengths	Weaknesses
Naturally diverse terrain: Ready land for racing (sand and rock) without expensive preparation costs Diversified income sources: The 'Training Week' concept generates additional profits before the official race Smart financial efficiency: Reducing fixed costs by relying on prefabricated and assembled stands Integrated entertainment zone: Attracting the public and food trucks to increase profits	Revenue seasonality: Concentration of income and profits in a short period (only 10 days per year) Dependence on temporary labor: Operating hundreds of youth on a daily basis for training and supervision requires double effort High safety costs: The budget is committed to digital tracking systems and comprehensive medical insurance in the desert
Opportunities	Threats
Infrastructure development: Benefiting from the 'New North Luxor Axis' for easy and flexible access to the site Massive sponsorship contracts: Desire of major international car and oil companies to fund the event for marketing purposes State support for development: Project alignment with the Ministry of Tourism's vision to encourage adventure tourism in Upper Egypt	Sudden weather fluctuations: Probability of dust storms in the desert that may affect event schedules Long licensing procedures: Time required to obtain security approvals and international rally licenses Regional competition: Presence of strong and established rallies in neighboring countries that may attract professional competitors

Chapter Three: Legal Study

Introduction to the Legal Study

The legal study is an analytical study of all legal aspects and relevant laws that must be adhered to when wishing to start and establish any project, along with knowledge of the state's general policies. For example, if this investment project is to be implemented as a joint stock company, an individual company, or an institution, this legal study appears. The importance of the legal study is evident in knowing the legal problems affecting the investment project and ignoring them, identifying the legal form of the investment project, and knowing all the legal papers that must be extracted before starting implementation.

Given the nature of our project, the ideal legal form is an Egyptian joint stock company, as it focuses on financial consideration and its main objective is profit through assembling massive capital.

Definition of an Egyptian Joint Stock Company

It is a capital company whose capital is based on 'financial consideration' and not personal. Its capital is divided into equal-value shares tradable through commercial methods and the stock exchange. It consists of a number of shareholders (no less than 3 legally), with shareholder liability limited to the amount of shares they own only, and the company has a legal personality completely independent from the financial affairs of its owners.

Characteristics of an Egyptian Joint Stock Company:

- 29. Pure financial consideration: It does not matter who the partner is or what their name is; what matters is the amount of money (shares) contributed to the project.
- 30. Limited liability: If the project fails or accumulates debts, the shareholder is not held responsible with their personal assets; their maximum loss is only the value of their shares within the company.
- 31. Share trading: Any shareholder can sell their shares or transfer them to others with complete freedom without needing the approval of other partners.
- 32. Trade name: The company's name is derived from its commercial purpose (e.g., Luxor Company for Rally Development and Adventure Tourism — Egyptian Joint Stock Company), and its name may not contain the name of a person or partner, unlike partnership companies.

Advantages of the Egyptian Joint Stock Company:

- 33. High capacity for financing large projects: It allows you to gather very large capital (such as EGP 7 million for the project) by offering shares to a large number of investors, which is difficult to achieve in other types of companies.
- 34. Financial security for investors (attracting partners easily): The limited liability of shareholders is considered a magic attraction advantage; the investor enters the project

reassured that their personal assets (home, car, other accounts) are fully protected from any loss that may happen to the project.

35. Ease of entry and exit (financial flexibility): If any investor needs to liquidate their assets, they can sell their shares on the stock exchange or transfer them to another person immediately, without affecting the company or stopping the rally project.
36. Continuity and non-affectedness by persons: The company has a 'long and independent life'; if a shareholder withdraws, a new investor joins, or even if one of the partners passes away, the project remains standing and operational, which gives government agencies and international companies the security to deal with you.
37. Professionalism in management: It gives you the advantage of using executive managers and rally management and sports marketing experts to manage the project through the 'Board of Directors,' without regard to kinship or personal trust relationships, ensuring operational success.
38. Prestigious and creditworthy image before the state and banks: Joint stock companies enjoy a very high trust and credibility with banks to obtain loans, and with the Ministry of Tourism and security agencies to obtain rally licenses, because they are subject to strict state oversight.

Required Licenses and Approvals

General Investment Authority (GAFI)	Egyptian Automobile & Tourism Club
Application to establish an Egyptian joint stock company (S.A.E.) pursuant to Law No. 72 of 2017	Technical approval on the proposed rally track plan and desert routes
Certificate of non-duplication of the project's trade name	Official sports license to hold events under the umbrella of the International Automobile Federation
Bank certificate of depositing the minimum issued capital	Adoption of technical specifications and safety and security standards for modified vehicles and competitors
Notarized and published company establishment contract and articles of association	
Commercial register and tax card extracted for the joint stock company	

Authorities Requiring Approval:

39. General Investment and Free Zones Authority (GAFI) and Commercial Register
40. Ministry of Youth and Sports (General Administration for Tourism and Sports Activities)
41. Ministry of Tourism and Antiquities (Egyptian General Authority for Tourism Promotion)
42. Ministry of Defense (Egyptian Armed Forces)
43. Ministry of Interior (Luxor Security Directorate)

44. Luxor Governorate and City Council

Authorities to be Notified:

45. Tax Authority

46. General Administration of Civil Defense and Ambulance

47. National Telecommunications Regulatory Authority

48. Hotel establishments in Luxor

Chapter Four: Marketing Study

Definition of the Marketing Study

The marketing study is the process of collecting and analyzing information related to the target market, customers, and competitors, with the aim of identifying customer needs and desires, determining the best ways to market the product or service, achieving sales and profits, as well as helping in making appropriate marketing decisions and developing effective plans and strategies for the project's success.

Tourist Markets in Luxor Governorate

First: Primary Market

This is the market representing the largest proportion of visitors coming to Luxor Governorate:

- European tourists, especially those coming from Germany, France, Italy, and England.
- Those interested in cultural tourism and visiting ancient temples and tombs.
- Visitors to archaeological areas such as the Valley of the Kings, Karnak Temple, and Luxor Temple.
- Tourists seeking unique experiences such as the rally.

Second: Secondary Market

- Arab tourists coming from Gulf Cooperation Council countries.
- Asian tourists interested in ancient Egyptian civilization.
- Organized tourist groups through travel and tourism companies.
- University students and researchers interested in heritage and culture.

Third: Potential Market

- Domestic tourism from various Egyptian governorates.
- Egyptian families seeking entertainment and enjoyment.
- Adventure enthusiasts.
- Companies and institutions wishing to organize tourist trips and events.

Direct Competitors:

- El-Gouna International Rally
- El-Farafra Rally
- Egypt Crossing Challenge Rally
- Safari companies

Indirect Competitors:

- Nile entertainment activities
- Sound and light shows
- Archaeological and cultural visits

Services Provided by the Project:

- Participation in the race
- Rally experience week (free driving for hobbyists and adventure tourists)
- Race viewing ticket service
- Safety and tracking services
- Selling souvenir products
- Renting commercial spaces

SWOT Analysis — Marketing

Strengths	Weaknesses
Innovative and distinctive sports tourism idea that merges adventure with the archaeological character of Luxor Availability of an ideal natural desert environment for the rally Providing diverse services and more than one source of income Activating adventure tourism in Upper Egypt	Seasonality of tourism Relative rise in insurance costs
Opportunities	Threats
Providing job opportunities Increasing interest in sports tourism State support for tourism	Economic conditions Sudden weather changes Emergence of local competitors in the future

Survey Analysis

314 questionnaire forms were distributed to the number of tourists present. 114 forms were distributed in Luxor Governorate, 100 forms in Hurghada Governorate, and 100 forms through social media and the rally's own website. We obtained 264 forms, and the survey results were as follows:

1. Gender:

Gender	Count	Percentage
Male	132	50%
Female	132	50%
Total	264	100%

This table shows that the percentage of females equals 50% and the percentage of males equals 50%.

2. Age:

Age	Count	Percentage
18 – 25 years	119	45%
26 – 35 years	92	35%
35 and above	53	20%
Total	264	100%

This table shows that the highest percentage falls in the age range of 18–35 years at 80%.

3. Have you previously experienced a rally?

Choice	Count	Percentage
No	198	75%
Yes	66	25%
Total	264	100%

This table shows that the highest percentage has never experienced a rally at 75%.

4. Are you interested in adventure, sports, and motorsport tourism?

Choice	Count	Percentage
Yes, very much	132	50%
Somewhat	99	37.5%
No	33	12.5%
Total	264	100%

This table shows that the highest percentage is very interested in adventure, sports, and motorsport tourism at 50%.

5. What activity attracts you most inside the rally?

Choice	Count	Percentage
Watching the car race	132	50%
Free driving experience at the track	79	30%
Photography and simulating race atmosphere	53	20%
Total	264	100%

This table shows that the highest percentage prefer watching the car race at 50%.

6. Do you think that entertainment activities increase the attractiveness of the place?

Choice	Count	Percentage
No	40	15%
Yes	132	50%
Somewhat	92	35%
Total	264	100%

This table shows the highest percentage is 'Yes' at 50%.

7. What price level is appropriate for you?

Choice	Count	Percentage
Low	33	12.5%
Moderate	132	50%
High for a distinctive service	99	37.5%
Total	264	100%

This table shows the highest percentage prefer moderate pricing at 50%.

8. Are you interested in the presence of technological services in the rally?

Choice	Count	Percentage
Yes	132	50%
Somewhat	99	12.5%
Not interested	33	37.5%
Total	264	100%

This table shows the highest percentage is 'Yes' at 50%.

9. Can you recommend this type of tourism to your friends?

Choice	Count	Percentage
No	33	12.5%
Yes	132	50%
Maybe	99	37.5%
Total	264	100%

This table shows the highest percentage is 'Yes' at 50%.

10. What method do you prefer to learn about the rally?

Choice	Count	Percentage
Social media	92	35%
Advertisements	40	15%
Friends and acquaintances	66	25%
Travel and tourism websites	66	25%
Total	264	100%

This table shows that social media is preferred at 35%.

Marketing Mix Elements

Element	Details
Place	Luxor Governorate – West Bank A desert area with natural terrain ideal for racing
Product	Core sports events Adventure activities for hobbyists and the public Services zone Smart digital technology services (electronic location app for the rally)
Price	Competitive prices suitable for various tourist segments Discounts and offers for groups and organized trips
Promotion	Social media, website, electronic advertisements Brochures and promotional publications Cooperation with tourism companies and hotels

Promotional Campaign Plan (Advertising Campaign)

Phase One: Pre-Opening

One month was designated for preparation before the project opens, with promotion through:

- Direct mail
- Illuminated signs
- Posters
- Non-illuminated signs (banners)
- Internet (paid advertisements — posting on social media pages)

Direct Mail:

300 invitations will be sent to tourism companies and owners of yachts and cruises. Mail cost = $15 \times 300 = 4,500$ EGP

Posters:

Number of posters = 2,000 | Cost per poster = 3 EGP | Total cost = 6,000 EGP

Non-Illuminated Signs (Banners):

Location	Size	Count	Unit Price	Total
Nile Docks	1×70	20	250	5,000
Near Tourism Companies	1×70	10	250	2,500
Nile Corniche	1×70	5	250	1,250
Television Street	1×70	5	250	1,250
Total		40		10,000

Internet:

Creating accounts on social media (Instagram, Facebook, email) and paying 1,000 EGP for advertising on social media for one month (renewable as needed).

Pre-Opening Costs Summary:

Advertising Medium	Cost
Direct Mail	4,500
Posters	6,000

Advertising Medium	Cost
Non-illuminated signs	10,000
Internet	1,000
Total	21,500

Phase Two: Opening Ceremony Costs

Component	Cost
Invitation cards	1,000
Beverages and food	2,900
Medals	1,000
Agendas	1,000
Decorations	2,000
DJ	1,500
Labor costs	2,000
Other costs	2,300
Total Cost	13,700

Phase Three: Post-Opening Promotional Plan

Direct Mail: 400 invitations to tourism companies, boat owners, and hotels. Cost = $10 \times 400 = 4,000$ EGP

Non-Illuminated Signs (Post-Opening):

Location	Size	Count	Unit Price	Total
Nile Docks	1×70	20	35	700
Near Tourism Companies	1×70	10	35	350
Nile Corniche	1×70	5	35	175
Television Street	1×70	5	35	175
Total				1,400

Post-Opening Posters:

Number = 2,000 | Cost = 1.5 EGP each | Total = 3,000 EGP

Internet (Post-Opening):

Creating company accounts on social media (Twitter, Instagram, Facebook, email, TikTok).

Paid advertisements for one year = $1,000 \times 12 = 12,000$ EGP

Other Promotional Means:

150 pens printed with the company name: $15 \times 150 = 2,250$ EGP

Post-Opening Total Costs:

Advertising Medium	Cost
Direct Mail	4,500
Signs	1,400
Posters	3,000
Internet	12,000
Pens	2,250
Total	23,150

Marketing Budget Summary:

Period	Cost
Pre-Opening	9,900
During Opening	13,700
Post-Opening	23,150
Total	46,750

Section Three: Revenues

Demand Function for Foreigners (French – Germans):

Year	Equation: $y = a + bx$	Expected Demand Volume in Luxor	5% Demand on Project
2026	$236,521.2 + (249,340.8 \times 6)$	1,732,566	86,628
2027	$236,521.2 + (249,340.8 \times 7)$	1,981,906.8	99,095

Year	Equation: $y = a + bx$	Expected Demand Volume in Luxor	5% Demand on Project
2028	$236,521.2 + (249,340.8 \times 8)$	2,231,247.6	111,562
2029	$236,521.2 + (249,340.8 \times 9)$	2,480,588.4	124,029
2030	$236,521.2 + (249,340.8 \times 10)$	2,729,929.2	136,496

Revenue Function for Foreign Visitors (Year 2026):

Category	Percentage	Number of Tourists	Sale Price	Revenue
Track tickets – Standard	40%	2,600	\$30	\$78,000
Fan Zone packages	25%	1,625	\$50	\$81,250
VIP tickets	15%	975	\$150	\$146,250
Free driving experience package	10%	650	\$200	\$130,000
Race participation fees	10%	660	\$120	\$78,000
Total	100%	6,500		\$513,500

Revenue Function for Egyptian Visitors (Year 2026):

Category	Percentage	Number	Price (EGP)	Revenue (EGP)
Track tickets – Standard	40%	8,000	150	1,200,000
Fan Zone packages	25%	5,000	250	1,250,000
VIP tickets	15%	3,000	600	1,800,000
Free driving experience package	10%	2,000	400	800,000
Race participation fees	10%	2,000	500	1,000,000
Total	100%	20,000		6,050,000

Expected Revenue Volume for 2026:

Category	Foreign Revenue	Egyptian Revenue (EGP)	Total (EGP)
Track tickets – Standard	\$78,000	1,200,000	5,100,000
Fan Zone packages	\$81,250	1,250,000	5,312,500
VIP tickets	\$146,250	1,800,000	9,112,500
Free driving experience package	\$78,000	1,000,000	4,900,000
Race participation fees	\$130,000	800,000	7,300,000
Total	\$513,500	6,050,000	31,725,000

Chapter Five: Technical and Engineering Study

Section One: Location, Design and Décor

Location:

The rally project is located in Luxor Governorate – West Bank. This location was chosen for its open desert nature suitable for rally races and its distance from residential areas. The location also enjoys proximity to Luxor's famous tourist sites, facilitating tourist access and increasing its attractiveness as an integrated sports tourism destination.

The project consists of five main sections:

- 49. Track and Stands section (Audience Management).
- 50. Fan Zone section.
- 51. VIP Hospitality and Dignitaries section.
- 52. Race and Sports Registration section.
- 53. Free Sports Experience section.

Estimated Areas for Rally Sections:

Item	Area
Main stands area and announcement platforms	1,200 m ²
Activities and entertainment services area	2,500 m ²
Central maintenance and workshop yard	3,000 m ²
Free driving experience track	1,500 m ²
Main administrative and technical headquarters and control rooms	450 m ²
Medical services area	850 m ²
Race start/finish gates	500 m ²
Total	10,000 m ²

Administrative Sections of the Project:

- 54. General Manager's office (Top Management)
- 55. Marketing, Public Relations, and Reception office
- 56. Financial Affairs office
- 57. Tourism and Entertainment Activities Coordinator's office
- 58. Reception and Reservations office

- 59. Security and Safety office
- 60. Race Control and Track Tracking room
- 61. Technical Inspection office
- 62. Employee Affairs and Human Resources office

Estimated Areas for Administrative Sections:

Item	Area
Top Management office	45 m ²
Marketing office	35 m ²
Financial Affairs office	35 m ²
Tourism and Entertainment Activities Coordinator office	35 m ²
Reception and Reservations office	40 m ²
Security and Safety office	30 m ²
Employee Affairs and Human Resources office	30 m ²
Race Control and Track Tracking room	60 m ²
Technical Inspection office	50 m ²
Total	325 m ²

Section Two: Equipment and Devices

Project Equipment and Devices:

Item	Quantity	Unit Price	Total
Electronic timing systems	2	125,000	250,000
Advanced tracking devices	60	18,000	1,080,000
Wireless communication devices	40	12,000	480,000
Control room display screens	6	46,000	270,000
Central network servers for storing race data	2	150,000	300,000
Drones	3	85,000	255,000
Total			2,635,000

Top Management Equipment:

Item	Quantity	Unit Price	Total
Manager's desk and chair	1	25,000	25,000
Wall clock	1	1,500	1,500
Leather chairs	3	12,000	36,000
Carpet	1	8,000	8,000
Reception table	1	30,000	30,000
Desk phone	1	4,500	4,500
Laptop	1	55,000	55,000
Air conditioner	1	35,000	35,000
Curtain	1	1,200	1,200
Trash bin	1	170	170
Total			173,870

Financial Affairs Equipment:

Item	Quantity	Unit Price	Total
Manager's desk	1	25,000	25,000
Staff desks	1	5,500	5,500
Chairs	1	4,500	4,500
Laptops	2	5,500	11,000
Cabinets	2	9,000	18,000
Telephones	2	4,500	9,000
Trash bins	2	170	340
Air conditioner	1	35,000	35,000
Curtains	2	1,200	2,400
Calculator	2	2,500	5,000
Total			115,740

Reception Section Equipment:

Item	Quantity	Unit Price	Total
Staff desk	1	5,500	5,500
Laptop	1	55,000	55,000
Telephone	1	4,500	4,500
Reception table	1	30,000	30,000
Display board	1	3,500	3,500
Chairs	2	4,500	9,000
Total			107,500

Services Area (Restrooms) Equipment:

Item	Quantity	Unit Price	Total
Soap dispensers	6	600	3,600
Mirrors	2	2,500	5,000
Wash basins	2	6,000	12,000
Trash bins	2	1,300	2,600
Towel dispensers	2	500	1,000
Total			24,000

Security Management Equipment:

Item	Quantity	Unit Price	Total
Security office	1	5,500	5,500
Chairs	5	4,500	22,500
Telephones	2	4,500	9,000
Air conditioners	2	35,000	70,000
Guard desk/bed	1	6,500	6,500
Camera monitor screen	1	5,000	5,000
Cameras	30	1,800	54,000
Entry/exit registration books	1	250	250
Total			172,750

Fire Suppression System Costs:

Item	Quantity	Unit Price	Total
Mobile fire extinguishers	4	5,000	20,000
Manual fire extinguishers	20	1,200	24,000
Electricity disconnection system	2	1,000	2,000
Total			46,000

Warning Signs:

Item	Quantity	Unit Price	Total
Fire warning signs	20	150	18,000
Electricity warning signs	5	120	600
Total			18,600

Celebration Equipment:

Item	Quantity	Unit Price	Total
Fire show sticks	5	800	4,000
Fire chains	5	600	3,000
Fire torches	22	500	11,000
Drums	5	400	2,000
Nubian costume	10	500	5,000
Bedouin costume	10	500	5,000
Accessories	20	500	10,000
Total			40,000

Audience Stands Equipment:

Item	Quantity	Unit Price	Total
Temporary metal stands (capacity: 50 persons each)	10	45,000	1,600
Reinforced plastic seats	250	5,000	125,000
Metal safety barriers	50	800	40,000

Item	Quantity	Unit Price	Total
Canopies for stands	5	15,000	75,000
Total			241,600

Track Infrastructure and Preparation Equipment:

Item	Quantity	Unit Price	Total
Track leveling and preparation	1	150,000	150,000
Internal site road construction	2	80,000	160,000
Temporary electricity network installation	1	120,000	120,000
Total			430,000

Medical and Rescue Equipment:

Item	Quantity	Unit Price	Total
Equipped ambulances	2	350,000	700,000
First aid kits	10	2,500	25,000
Paramedic team	4	15,000	60,000
Total			785,000

Utilities and Logistics Management:

Item	Quantity	Unit Price	Total
Electric generators	2	60,000	120,000
Portable water tanks	4	8,000	32,000
Portable restrooms	6	12,000	72,000
Total			224,000

Total Services Summary:

Item	Total
Project Equipment	2,635,000

Item	Total
Top Management Equipment	173,870
Engineering and Maintenance Administration	59,870
Financial Affairs	115,740
Reception Section	107,500
Security Management	172,750
Audience Stands Equipment	241,600
Services Area Equipment (Restrooms)	24,000
Medical and Rescue Equipment	785,000
Fire Suppression System	46,000
Warning Signs	18,600
Celebration Equipment	40,000
Equipment and Devices	2,635,000
Utilities and Logistics Services Management	224,000
Structural Works and Track Preparation	430,000
Grand Total	7,751,130

Chapter Six: Human Resources

Human Resources Study

Human resources is not merely another name for employees; it is a more comprehensive definition and represents the department responsible for managing the human element in organizations by providing recruitment operations, training, and skills development to achieve the expected benefit for the organization.

Organizational Structure

Technical and Administrative Management:

- 63. General Manager
- 64. Race Director
- 65. Financial and Administrative Manager
- 66. Timing and Officiating Officer
- 67. Track Maintenance Engineer

Technical and Logistical Administration:

- 68. Logistics Service Manager
- 69. Public Relations and Media Officer

Safety and Security Administration:

- 70. Safety and Rescue Supervisor

General Manager Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Years of Experience	Position
Overseeing all activities and making decisions Defining long-term vision and strategies Monitoring and managing the budget and ensuring compliance with financial and accounting standards	Good appearance Proficiency in foreign languages Ability to think and innovate Ability to bear responsibility Possessing administrative skills	Bachelor's degree in Tourism and Hotels	10 years	General Manager

Tasks and Responsibilities	Job Requirements	Qualification	Years of Experience	Position
Developing and maintaining relationships with partners and identifying areas for improvement	Experience in tourism Familiarity with project management programs			

Accounting Staff Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Overseeing financial affairs Preparing financial account reports Identifying financial operations and following up on them and resolving related problems	Experience in using accounting software Time management and ability to handle work pressure Credibility and integrity in dealing with financial information	Bachelor's degree in Commerce (Accounting department preferred)	3 years	Accountant

Marketing Officer Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Promoting the rally Managing advertising campaigns Monitoring customer opinions and analyzing the market	Communication and negotiation skills Proficiency in using social media Ability to prepare marketing campaigns	Bachelor's degree in Commerce or Marketing	2 years	Marketing Officer

Tourism Activities Coordinator Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Organizing tourism and recreational activities	Organization and coordination skills	Appropriate university	1 year	Tourism Activities

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Coordinating with participants and guides Following up on entertainment program implementation	Ability to deal with visitors Teamwork	degree (Tourism and Hotels preferred)		Coordinator

Reservations Officer Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Managing customer reservations Following up on arrival and departure times Responding to customer inquiries and confirming reservations	Persuasion and communication skills	Appropriate university degree	2 years	Reservations Officer

Safety Officer Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Following up on safety procedure implementation Checking emergency equipment Dealing with emergency cases Awareness of workers about safety procedures	Knowledge of security and safety procedures Ability to deal with emergencies First aid certificate preferred	Appropriate degree in Occupational Safety or Crisis Management	2 years	Safety Officer

Reception Officer Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Welcoming visitors and customers Responding to inquiries Recording data Coordinating between different departments	Good appearance and elegance Excellent communication skills Ability to organize work Proficiency in	Intermediate or high school graduate	1 year minimum	Reception Officer

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
	computer use			

Race Director Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Full oversight of race conduct Making emergency decisions Coordinating between all committees	Quick decision-making – leadership – English proficiency	Bachelor's degree in Sports or Engineering Management	10 years	Race Director

Timing and Officiating Officer Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Recording competitor times, ensuring compliance with regulations and recording penalties	High precision – proficiency in electronic timing software	Bachelor's degree in Computer Science or Electronic Engineering	5 years minimum	Timing and Officiating Officer

Track Maintenance Engineer Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Ensuring the safety of the rally track Maintaining the desert road Ensuring it is obstacle-free	Experience with ground leveling equipment – desert environment experience	Bachelor's degree in Civil or Road Engineering	7 years minimum	Track Maintenance Engineer

Logistics Services Manager Appointment Criteria:

Tasks and Responsibilities	Job Requirements	Qualification	Experience	Position
Ensuring accommodation, fuel, water, transportation, and inventory management	High organizational ability and supplier/vendor management under pressure	Bachelor's degree in Business Administration or Logistics	7 years minimum	Logistics Services Manager

Staff Salaries:

Position	Count	Daily Wage	Work Hours	Monthly Total
General Manager	1	2,500	8	75,000
Race Director	1	2,000	12	60,000
Logistics Services Manager	1	1,500	10	45,000
Track Maintenance Engineer	2	1,200	10	72,000
Timing and Officiating Officer	2	1,200	12	72,000
Safety Officer	1	1,200	12	36,000
Marketing Officer	1	1,000	8	30,000
Financial Affairs Officer	1	1,000	8	30,000
Tourism Activities Coordinator	1	900	8	27,000
Reservations Officer	1	800	8	24,000
Reception Officer	1	700	8	21,000
Paramedics	4	900	12	108,000
Security Guards	10	500	12	150,000
Cleaning Workers	6	400	8	72,000
Total	33			792,000

Human Resources Cost Summary:

Item	Total
Salaries	792,000
Uniforms (security: 10 × 300 × 10 sets)	3,000
Total HR Cost	795,000

Work Policies:

- 71. Commitment to attendance and departure times.
- 72. Commitment to official uniforms.
- 73. Preservation of all facilities and equipment.
- 74. Compliance with security and safety procedures.
- 75. Good conduct with visitors and guests.
- 76. Maintaining cleanliness of the site and surrounding environment.

Chapter Seven: Occupational Safety and Security

Introduction

Occupational safety and security is a set of procedures and measures aimed at protecting workers and visitors from dangers and accidents within the work environment, and providing a safe environment that ensures the safety of individuals and property and improves work efficiency.

Concept of Industrial Safety:

Industrial safety is a set of procedures and systems that aim to protect workers, facilities, and equipment from potential accidents and hazards within the work environment, ensuring the safety of individuals and continuity of operation with efficiency and security.

Objectives of Occupational Safety and Health:

- 77. Protecting workers from work accidents and injuries.
- 78. Providing a safe and healthy work environment.
- 79. Reducing occupational hazards and work-related diseases.
- 80. Preserving property and equipment from damage and loss.
- 81. Raising worker efficiency and productivity.
- 82. Spreading safety culture awareness among workers.
- 83. Complying with laws and regulations specific to safety and occupational health.
- 84. Reducing human and material losses resulting from accidents.

Safety Procedures to be Followed Inside the Company:

- 85. Training workers on how to deal with emergency situations.
- 86. Providing fire extinguishers and maintaining them regularly.
- 87. Placing guidance boards and safety instructions in all departments.
- 88. Ensuring the safety of equipment and devices and conducting regular maintenance.
- 89. Providing personal protective equipment for workers and using it correctly.
- 90. Identifying emergency exits and keeping them free of obstacles.
- 91. Implementing evacuation plans and training on them regularly.
- 92. Immediate reporting of any hazards or accidents and taking necessary measures to address them.

Steps of Working with the Occupational Safety and Health System:

- 93. Identifying potential hazards in the work environment.
- 94. Assessing hazards and analyzing their effects.

- 95. Developing preventive measures to reduce hazards.
- 96. Providing necessary safety equipment and tools.
- 97. Training workers on occupational safety and health rules.
- 98. Applying safety instructions and procedures during work.
- 99. Regularly monitoring compliance with safety procedures.
- 100. Immediately reporting accidents and hazards and addressing them.
- 101. Conducting inspection and regular maintenance of equipment.
- 102. Continuously reviewing and developing the occupational safety and health system.

Results of Working with the Occupational Safety and Health System:

- 103. Reduced rates of occupational accidents and injuries.
- 104. Providing a safe and healthy work environment for workers.
- 105. Increased worker efficiency and productivity.
- 106. Reducing occupational hazards and diseases.
- 107. Reducing material losses resulting from accidents.
- 108. Raising the level of safety culture awareness among workers.
- 109. Improving performance quality within the facility.
- 110. Enhancing the institution's reputation and compliance with regulations and laws.

Accident Causes — Human Factors:

- 111. Non-compliance with safety instructions.
- 112. Negligence or carelessness during work.
- 113. Lack of experience or training.
- 114. Physical fatigue and exhaustion.
- 115. Rushing in performing work.
- 116. Misuse of equipment and tools.
- 117. Weak focus and attention.
- 118. Not using personal protective equipment.

Accident Causes — Natural Factors:

- 119. Bad weather conditions.
- 120. High or low temperatures.
- 121. Rain and floods.
- 122. Severe storms and winds.
- 123. Earthquakes and lightning.

Causes of Fires:

- 124. Electrical short circuits.
- 125. Misuse of devices and equipment.
- 126. Leakage of flammable materials.
- 127. Smoking in non-designated areas.
- 128. Negligence and non-compliance with safety procedures.

General Rules for Fire Extinguishing:

- 129. Maintaining calm and not panicking.
- 130. Identifying the type of fire before starting to extinguish it.
- 131. Using appropriate extinguishing means.
- 132. Standing in a safe direction away from smoke.
- 133. Not exposing oneself to danger during extinguishing.
- 134. Ensuring the fire is completely extinguished before leaving the site.

Prevention of Electrical Accidents:

- 135. Regularly checking electrical connections.
- 136. Not touching devices with wet hands.
- 137. Using insulating equipment and tools.
- 138. Disconnecting electricity before maintenance.
- 139. Not overloading electrical sockets beyond their capacity.
- 140. Immediately reporting any electrical faults.

Chapter Eight: Financial Study

Financial Study Content

- Financial Feasibility Study
- Objectives of the Financial Feasibility Study
- Phases of the Financial Feasibility Study
- First: Estimating Investment Costs
- Investment Costs List
- Second: Annual Operating Costs List
- Third: Annual Depreciation List
- Fourth: Estimated Income Statement
- Fifth: Cash Flows Statement
- Profitability Assessment Phases
- First: Payback Period Method
- Second: Net Present Value Method
- Third: Internal Rate of Return on Investment Method

First: Investment Costs List

These are all costs spent on the project from the idea until its establishment and start of operation. This list consists of the following elements:

141. Fixed Assets (Fixed Capital): Land, buildings and décor, equipment and devices.
142. Foundation Expenses: All amounts spent on the project before its opening except for fixed assets (e.g., feasibility study expenses, pre-opening marketing campaign costs, opening ceremony, licensing expenses, legal and engineering consultation fees).
143. Working Capital: The amount sufficient to operate one operating cycle.
144. General Reserve: An amount of money reserved to face potential future project risks, usually 5% of total investment costs without working capital.

Investment Costs List:

Item	Cost	Total
1- Fixed Assets		
Land use right for 30 days	100,000	
Buildings and décor	260,000	
Equipment and devices	7,751,130	
Fixed Assets Total		8,111,130

Item	Cost	Total
2- Foundation Expenses		
Licenses	80,000	
Feasibility study	30,000	
Pre-opening advertising	21,000	
Opening ceremony	403,700	
Foundation Expenses Total		535,200
Working Capital	795,000	
General Reserve (5% × fixed assets + foundation expenses)		432,316
Grand Total		9,873,646

Working Capital Calculation:

Working Capital = Total Annual Operating Costs (without depreciation and taxes) ÷ Capital Turnover Rate (4 times per year, covering quarterly expenditures)

$$1,653,000 \div 4 = 413,250 \text{ EGP}$$

General Reserve Calculation:

General Reserve = (Fixed Assets + Foundation Expenses) × 5%

$$8,111,130 + 535,200 \times 5\% = 432,316.5 \text{ EGP}$$

$$8,111,130 + 535,200 + 795,000 + 432,316 = 9,873,646 \text{ EGP}$$

Annual Operating Costs List:

Item	Total
Labor Costs (salaries and wages from technical study)	795,000
Annual Post-Opening Marketing Plan Costs	23,150
Logistics, Utilities and Maintenance Operations	350,000
Costs of Renting Portable Stands and Folkloric Event Accessories	131,850
Total Annual Operating Costs	1,300,000

Annual Depreciation List:

Item	Asset Value	Depreciation Period	Annual Installment
Devices, Technical Network System, and Fire Suppression System	3,500,000	5 years	700,000
Timing Gates and Backup Electric Generator	1,500,000	10 years	150,000
Administrative Furniture and Chairs	500,000	7 years	71,429
Total	5,500,000		921,429

Estimated Income Statement (First Year):

Financial Item	Value
Total Expected Revenues for 2026	31,725,000
Total Annual Operating Costs	1,300,000
Annual Fixed Asset Depreciation (at average 10% rate)	811,113
Net Investment Profit Before Tax Deduction	29,613,887
Income Tax on Egyptian Joint Stock Companies	6,663,125
Net Free Cash Return Targeted and Distributed to Shareholders	22,950,762

Net Income Statement:

Revenues (from Marketing Study)	Expenses (Total Operating Costs without Tax)
31,725,000	9,873,646

Net Profit = 31,725,000 – 9,873,646 = 21,851,354 EGP

Income Tax = Net Profit × 20%

Income Tax = 21,401,354 × 20% = 4,280,270.8 EGP

Cash Flows Statement:

Year	Net Cash Inflows	Net Cash Outflows	Net Cash Flows
Year Zero	0	1,500,000	1,500,000
Year One	2,500,000	1,040,106	1,459,894
Year Two	2,750,000	1,121,418	1,628,582
Year Three	3,025,000	1,209,607	1,815,393
Year Four	3,327,500	1,305,300	2,022,200
Year Five	3,660,250	1,409,181	2,251,069
Year Six	4,026,275	1,521,999	2,504,276
Year Seven	4,428,902	1,644,576	2,784,327
Year Eight	4,871,793	1,777,811	3,093,982
Year Nine	5,358,972	1,922,691	3,436,281
Year Ten	5,894,869	2,080,295	3,814,574

Project Profitability Assessment

First: Payback Period Method

Year	Annual Net Cash Flow	Cumulative Total
Year Zero	1,500,000	-1,500,000
Year One	1,459,894	-40,106
Year Two	1,628,582	1,588,476
Year Three	1,815,393	3,403,869
Year Four	2,022,200	5,426,069
Year Five	2,251,069	7,677,138
Year Six	2,504,276	10,181,414
Year Seven	2,784,327	12,965,741
Year Eight	3,093,982	16,059,723
Year Nine	3,436,281	19,496,004
Year Ten	3,814,574	23,310,578

Payback Period = Number of years before the investment recovery year + Remaining amount to complete recovery ÷ Net cash flow for the recovery completion year

$$40,106 \div 1,628,582 = 0.0246$$

$$0.0246 \times 12 = 0.295 \text{ months}$$

$$0.295 \times 30 = 8.85 \approx 9 \text{ days}$$

Payback Period = 1 year, 0 months, and approximately 9 days

Recommendation

Given that the project's investment cost recovery period is acceptable and the internal rate of return on investment is greater than the inflation rate, and the net present value is positive... the project is acceptable and we recommend its establishment.
